OFFICIAL SOFTWARE MANUAL

E-Attendance System

Complete Operational Handbook & Serial Feature Guide

This manual provides a detailed step-by-step walkthrough of all options and features in the **E-Attendance Management Platform**. It covers Biometric Device Management, Push SDK Sync, Shift Scheduling, Access Control, Attendance Processing, Entitlement Leaves, Executive Reports, and System Administration.

Developer: PB Tech Zone **Version:** v1.0.0 (Release) **Date:** July 2026

Table of Contents & Serial Module Index

The following index lists all options serially as available in the E-Attendance sidebar and navigation menu:

01	**Login & Authentication**	User authentication, license verification, developer contacts
02	**System Dashboard**	Real-time attendance counters, device ping status, quick stats
03	**Organization Setup**	Areas, Departments, Designations & Employee Categories
04	**Device Management**	Biometric hardware integration, Push SDK, PING diagnostic
05	**Employee Management**	Master employee profiles, biometric enrollment, department mapping
06	**Shift Setup - Break Time**	Meal and refreshment break rules configuration
07	**Shift Setup - Time Table**	Working hours, check-in/out windows, late grace period
08	**Shift Setup - Shifts**	Regular, flexible, night, and rotating shift master rules
09	**Schedule Shift - Assignment**	Individual and departmental shift schedule assignment
10	**Schedule Shift - Group Management**	Roster group creation and team scheduling
11	**Schedule Shift - Preview**	Monthly and weekly shift calendar matrix preview
12	**Access Control - Time Period**	Door access time slots and timezone definitions
13	**Access Control - Access Group**	Security access group grouping and door rules
14	**Access Control - Combination**	Multi-person unlock verification combinations
15	**Access Control - Privilege**	Door access rights assignment per employee

16	**Transactions**	Raw biometric logs, manual punch regularization & approvals
17	**Leaves & Holidays**	Leave applications, entitlements, holiday master calendar
18	**Reports & Analytics**	Daily, Monthly summary, punch details, PDF & Excel export
19	**Logs**	System audit trails, user actions, device Push SDK command logs
20	**Settings**	Branding (Logo, Color), Database Backup, User Roles (RBAC)
21	**Self-Service - Apply Leave**	Employee self-service leave application form
22	**Self-Service - Web Check-In**	Browser-based remote check-in / check-out portal

1. Authentication & System Access

Option 01 System Login Interface

The E-Attendance login interface secures administrative access. Users authenticate with registered credentials. The login window performs live license verification and displays direct technical support channels.

- **Secure Authentication:** Validates user credentials against encrypted access records.
- **License Status Indicator:** Real-time display of system license validity and expiration status.
- **Developer Contacts:** Quick access to developer support (PB Tech Zone) via email and WhatsApp.

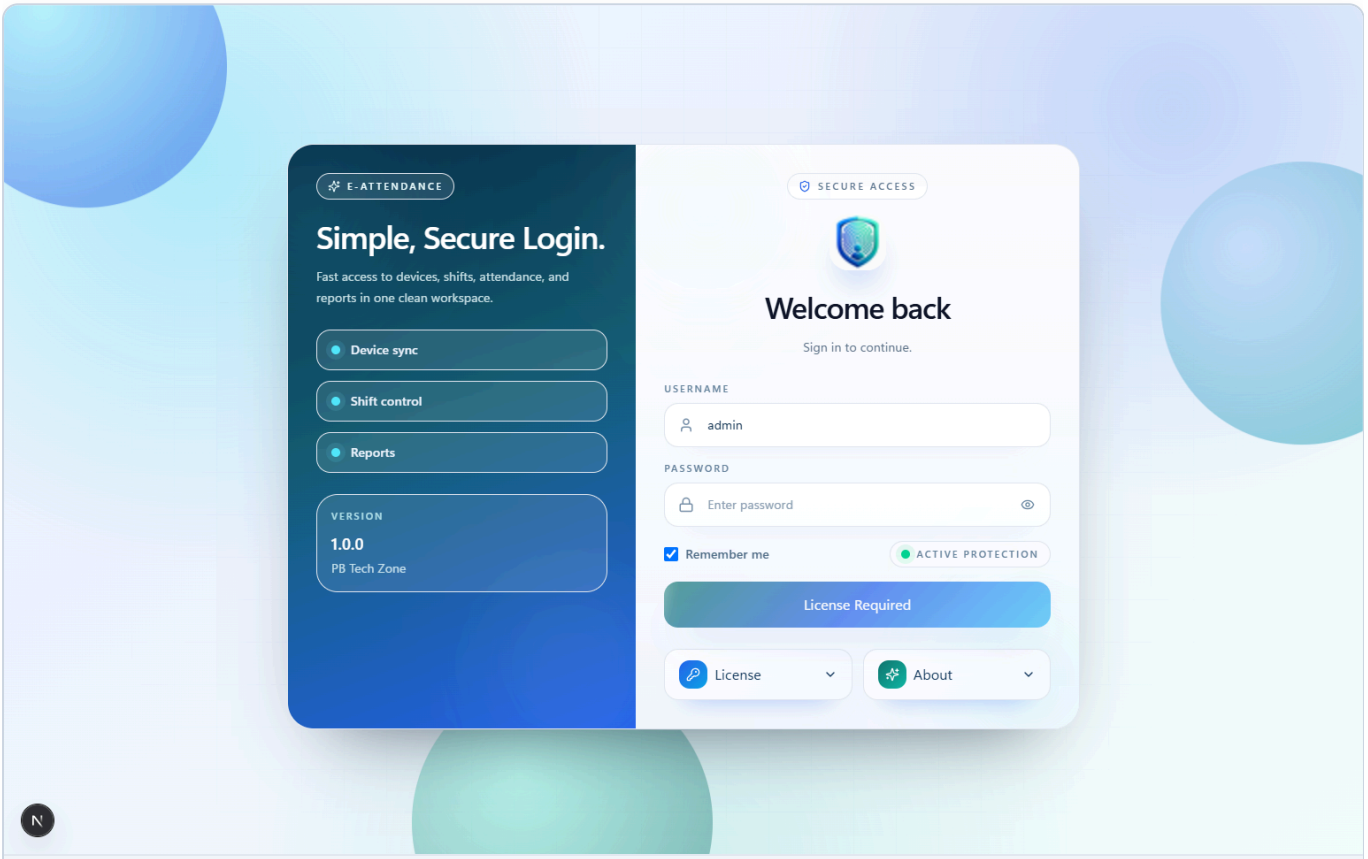

Figure 1.1: E-Attendance System Login Interface

2. Executive Dashboard

Option 02 Real-Time Attendance Console

The main dashboard displays an executive summary of today's attendance metrics across all departments, real-time biometric punch feeds, connected device health, and action shortcuts.

- **Today's Status Widgets:** Live counters for Present, Absent, Late In, Early Out, and Leave.
- **Device PING Cards:** Shows active biometric hardware terminals and network connectivity.
- **Recent Punch Stream:** Live feed of incoming biometric logs with timestamps and employee details.

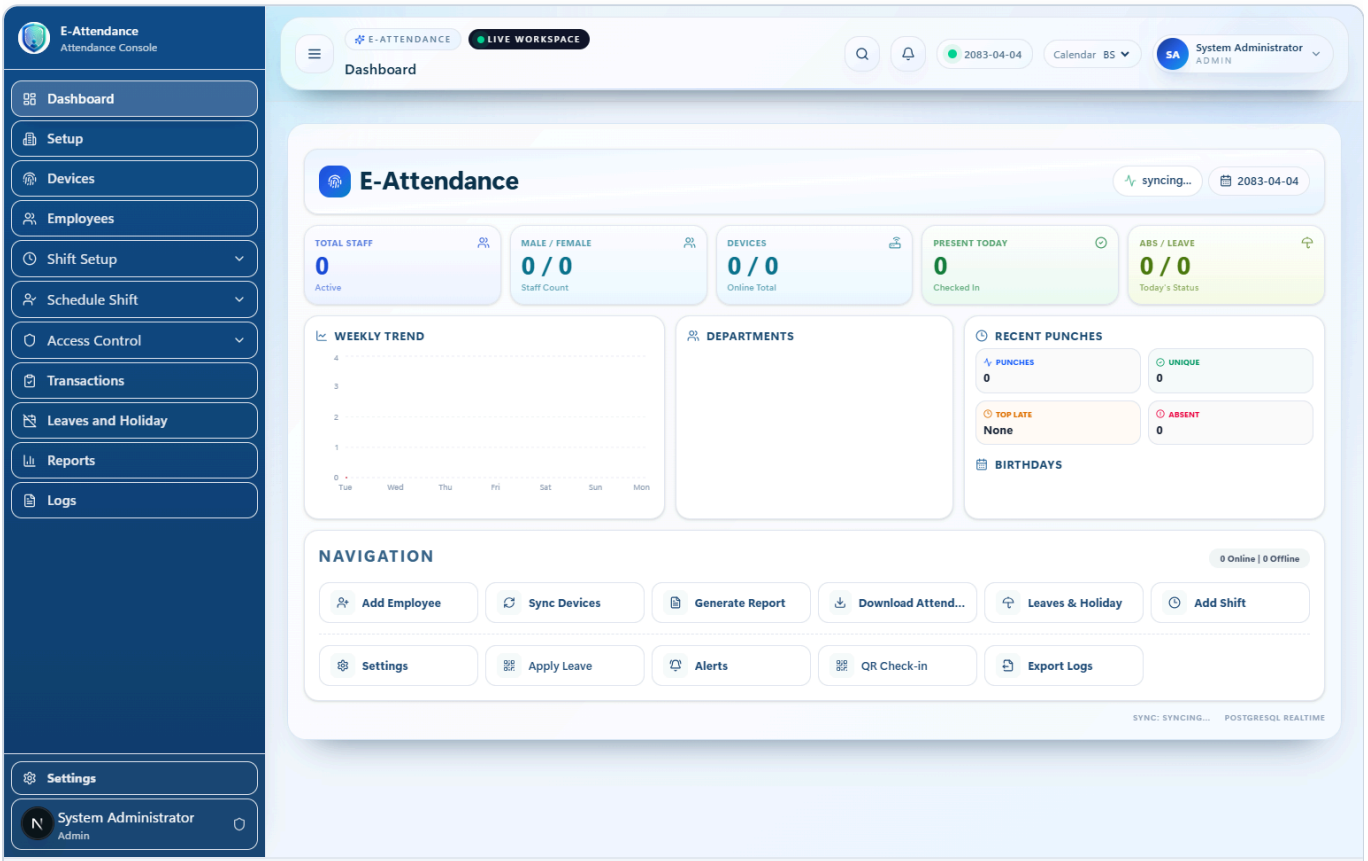

Figure 2.1: Executive System Dashboard

3. Organization Master Setup

Option 03 Areas, Departments & Categories

Structure your company hierarchy by defining geographical Areas, functional Departments, Designations, and Employee Categories for precise attendance and reporting rules.

- **Multi-Area Setup:** Group branch offices or project locations.
- **Department Structure:** Link sub-departments under main corporate divisions.
- **Category Classifications:** Define rules for permanent, contract, or shift personnel.

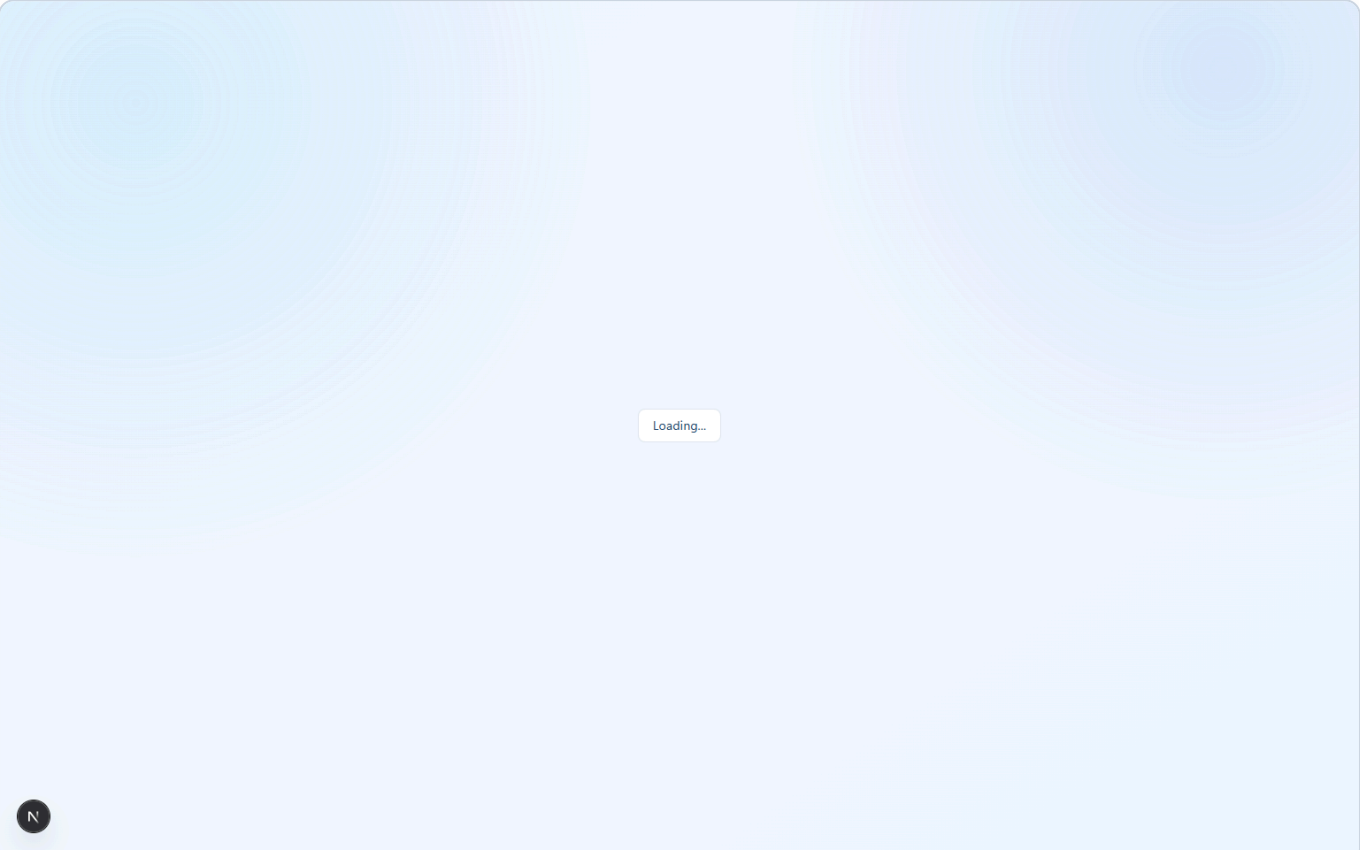

Figure 3.1: Organizational Setup (Areas & Departments)

4. Device Management

Option 04 Biometric Hardware & Push SDK

Manage connected fingerprint, face recognition, and RFID card terminals. Supports real-time Push SDK communication (ADMS/ICLK), instant command queuing, and diagnostic PING checks.

> **Push SDK Command Spec**
>
> Hardware command IDs must use short 13-character alias strings to conform to ZKTeco PUSH specifications and prevent device memory buffer overruns.

- **Terminal Registration:** Add hardware devices by Serial Number, IP, and assigned Area.
- **Live PING Test:** Verify network connectivity directly from the admin panel.
- **Remote Command Queue:** Sync user profiles, clear logs, and push firmware commands.

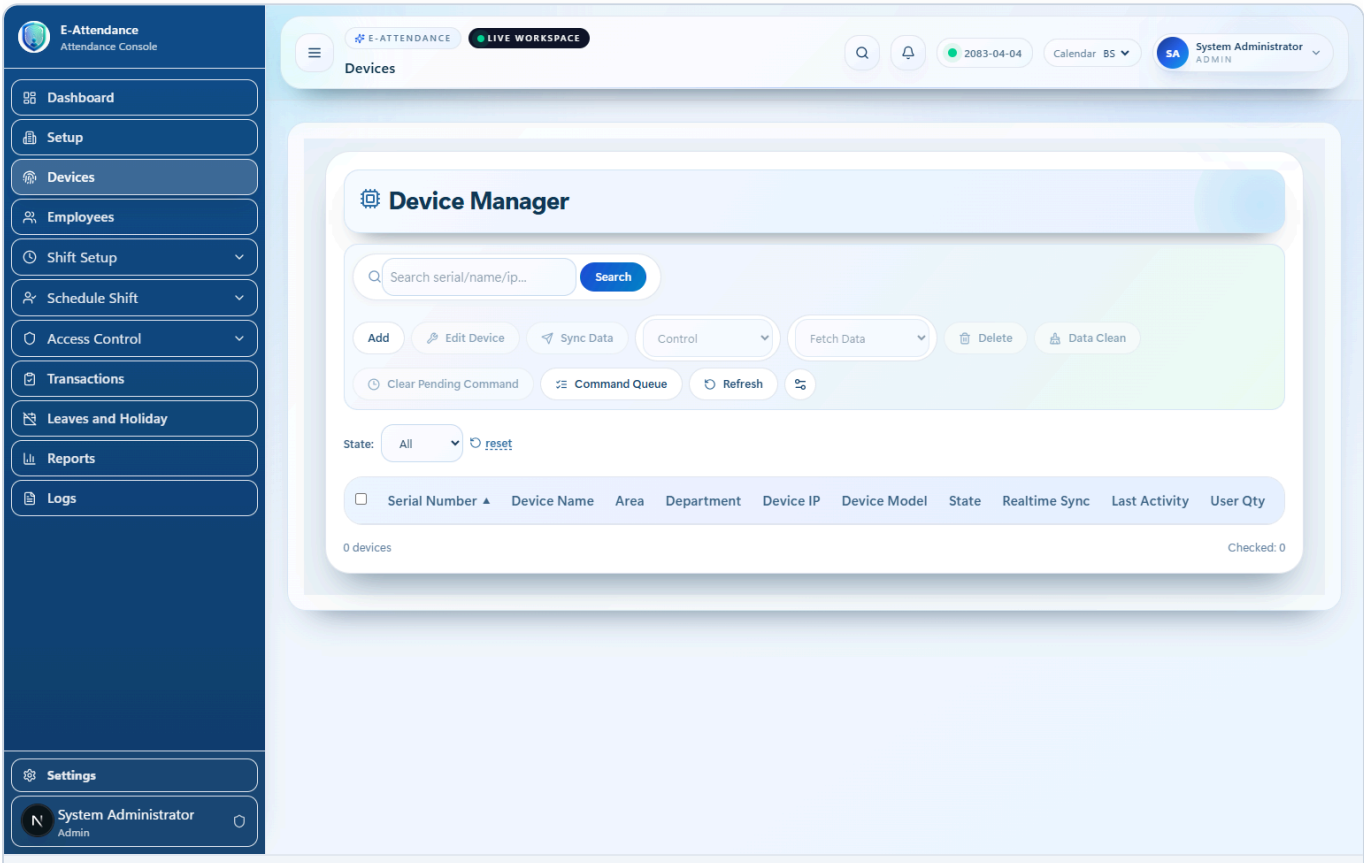

Figure 4.1: Biometric Device Management Panel

5. Employee Directory

Option 05 Master Employee Profiles

Maintain central employee master records, biometric card numbers, face IDs, mobile contacts, and department assignments.

- **Profile Management:** Record employee code, full name, joining date, and contact details.
- **Biometric Enrollment:** Associate RFID card numbers and fingerprint IDs to hardware devices.
- **Spreadsheet Import/Export:** Batch import employee lists directly from Excel spreadsheets.

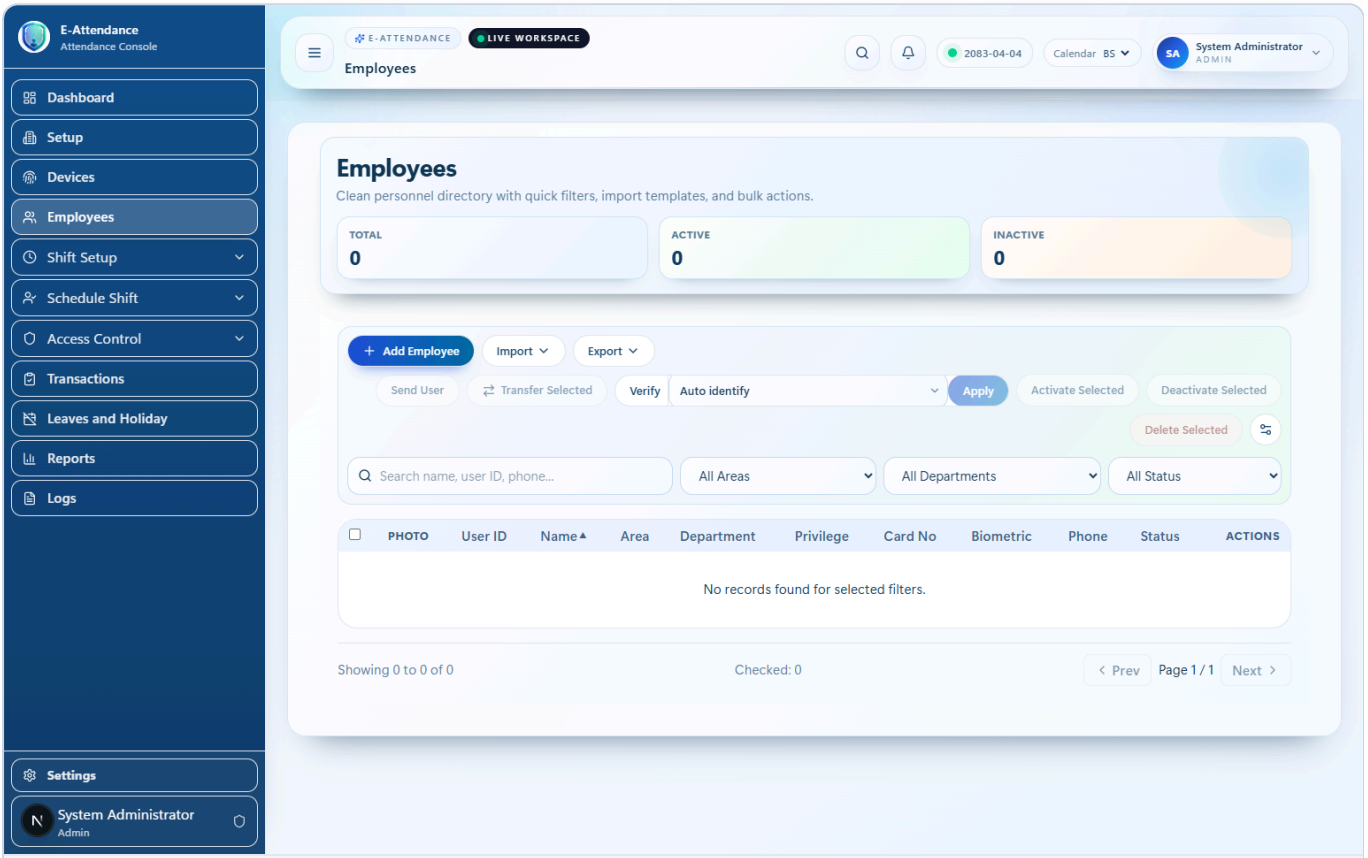

Figure 5.1: Master Employee Directory

6. Shift & Time Table Setup

Option 06 Break Time Setup

Configure paid or unpaid lunch, tea, and operational breaks linked to specific working shifts.

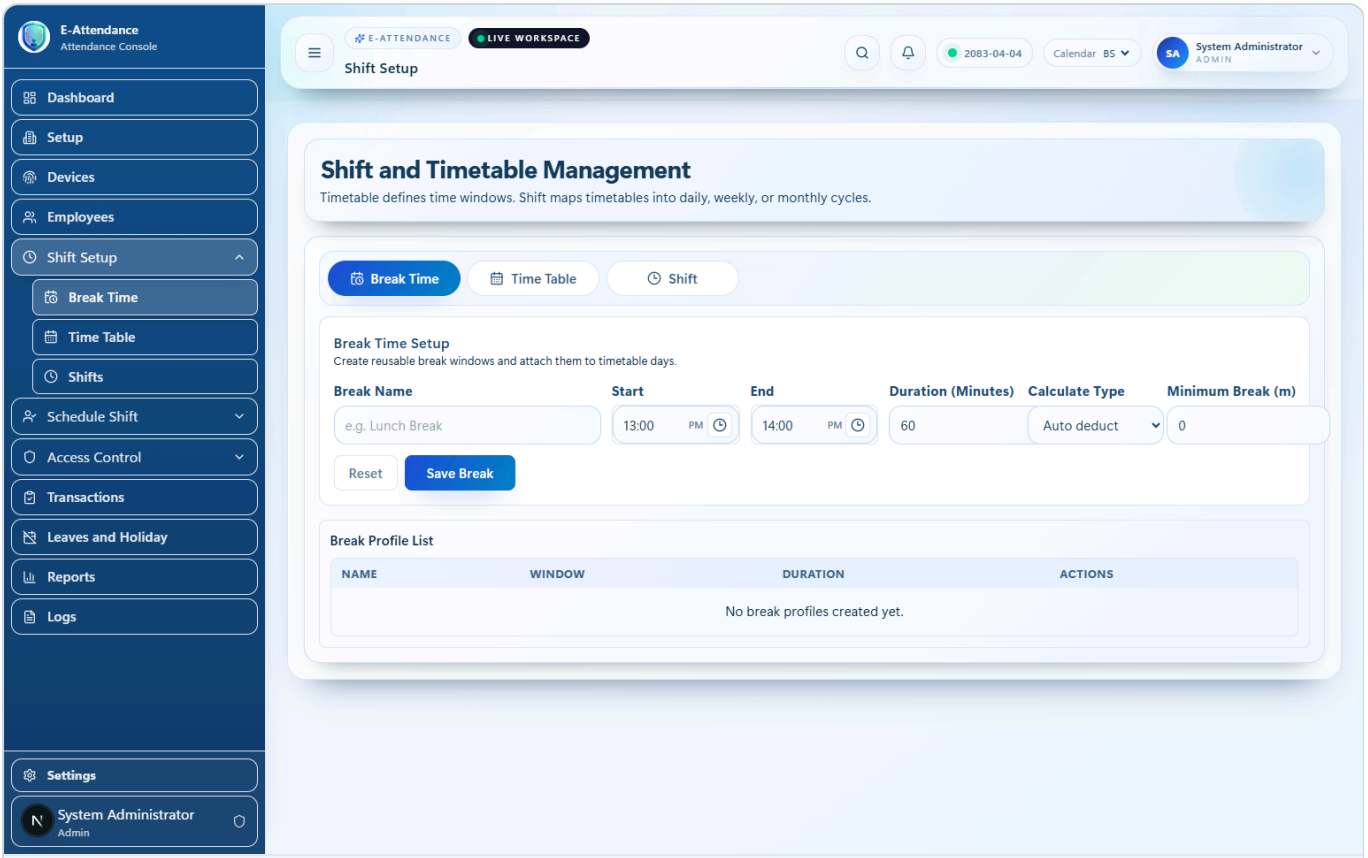

Figure 6.1: Break Time Configuration Window

Option 07 Time Table Master

Define standard check-in/check-out timing windows, late grace periods, early leave thresholds, and overtime start rules.

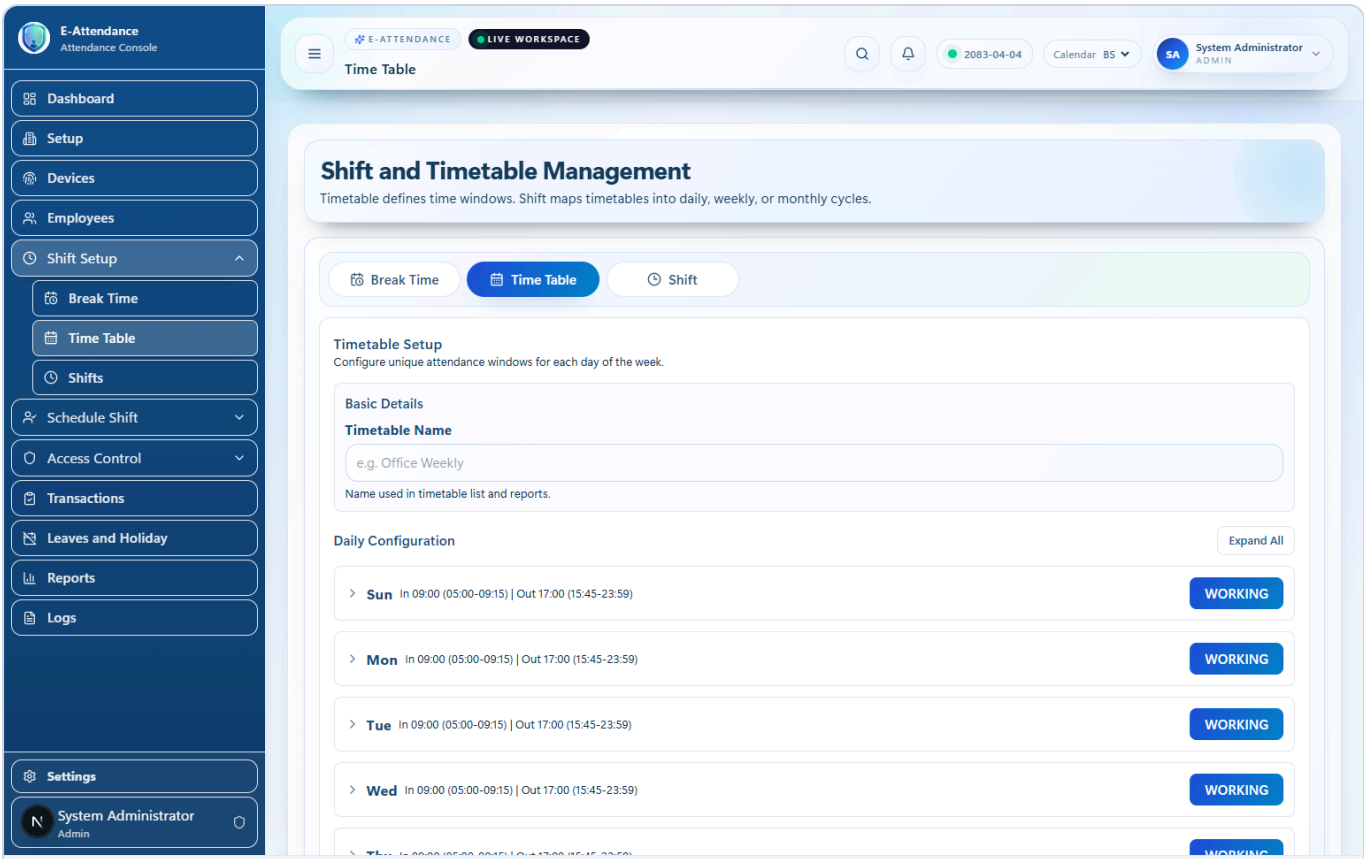

Figure 6.2: Time Table Parameters

Option 08 Shift Rules Setup

Combine time tables into complete shift routines (e.g., General Morning Shift, Evening Shift, Night Shift, Flexible Shift) with weekend off rules.

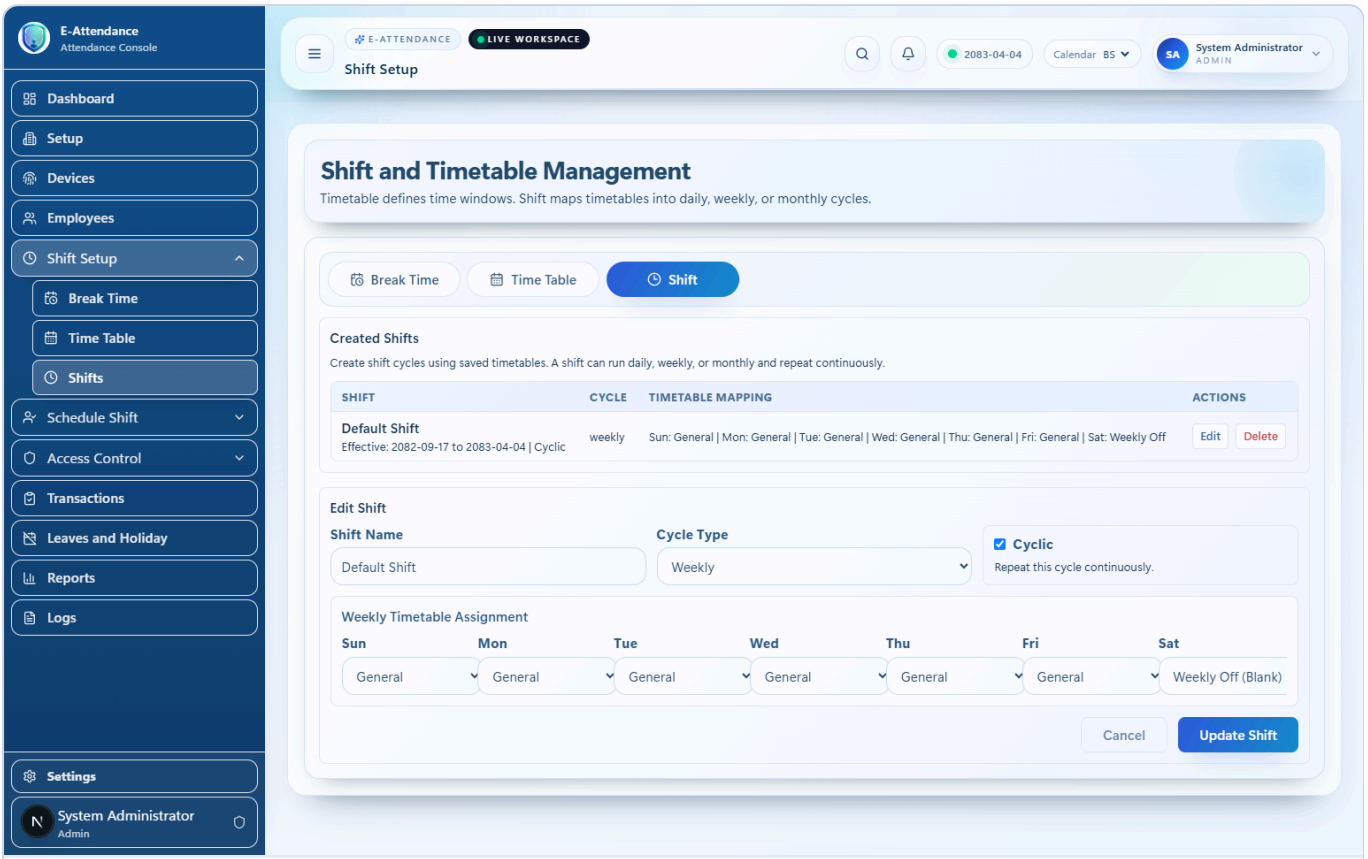

Figure 6.3: Shift Rules Setup Panel

7. Shift Scheduling & Rostering

Option 09 Schedule Assignment

Assign configured shifts to individual staff members or entire departmental units for specified date ranges.

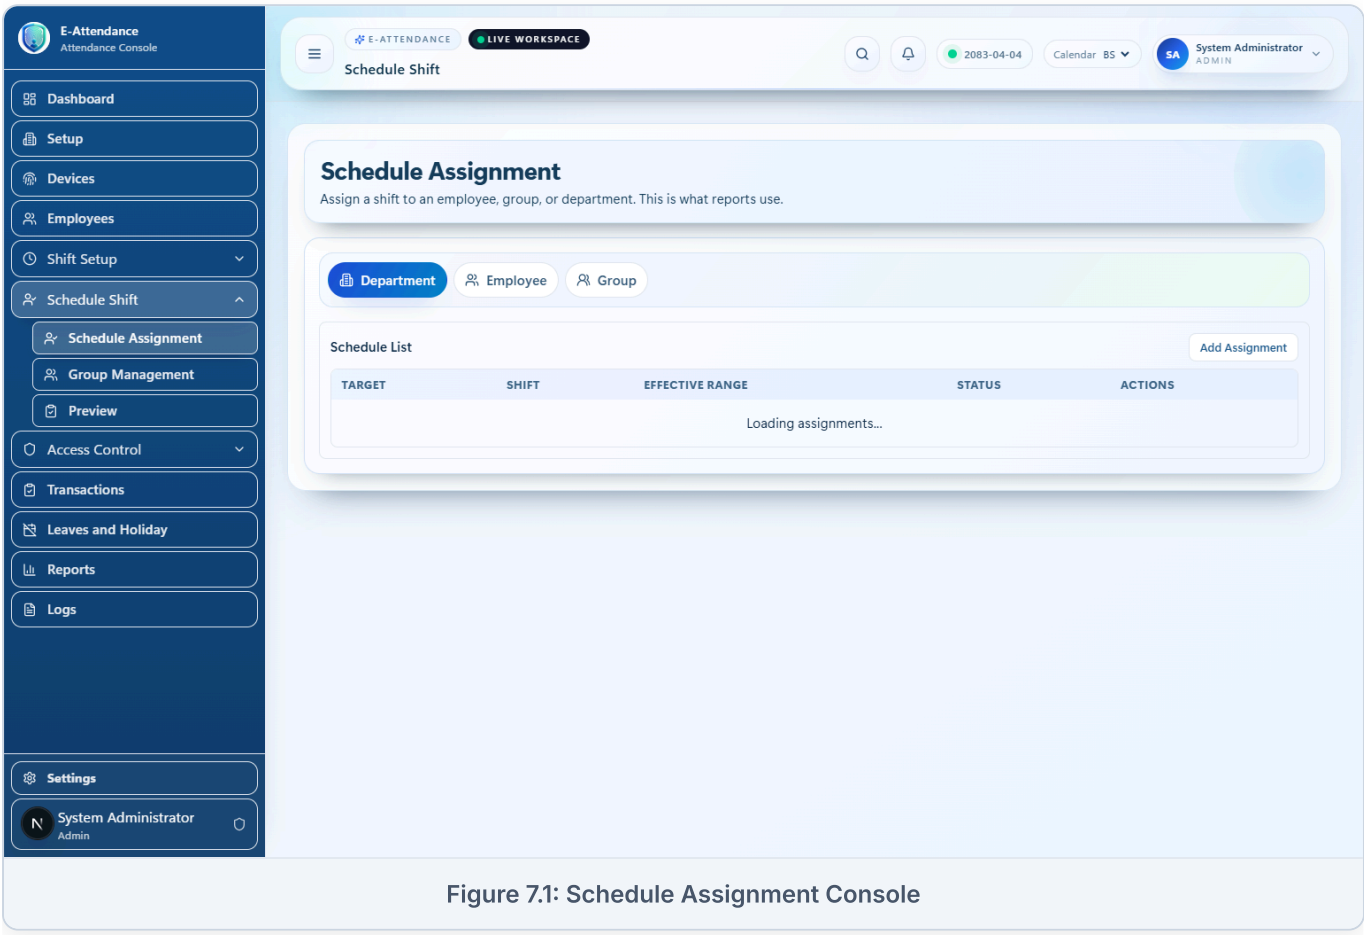

Figure 7.1: Schedule Assignment Console

Option 10 Roster Group Management

Organize employees into operational roster groups for easy rotational shift scheduling.

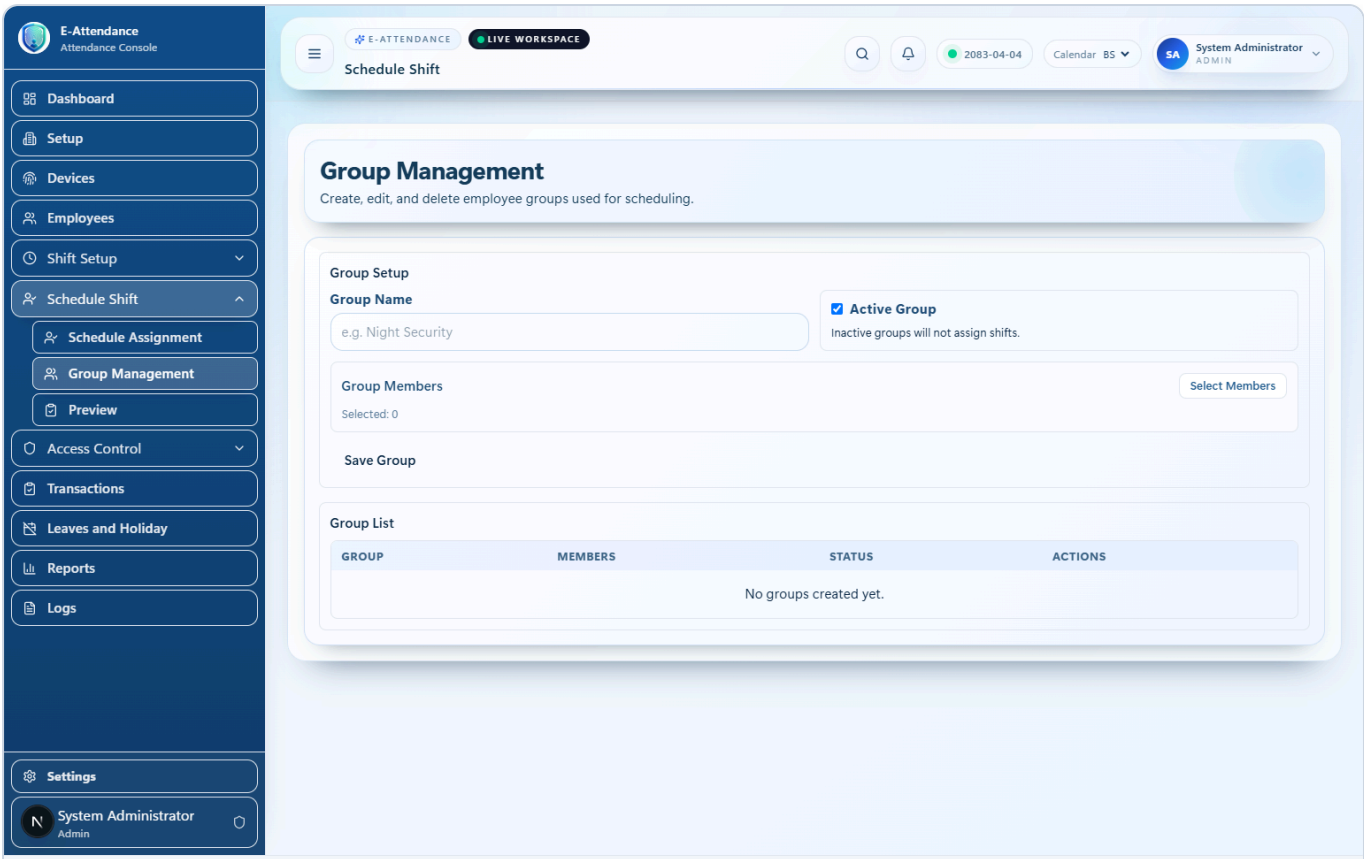

Figure 7.2: Roster Group Management

Option 11 Monthly Schedule Preview

Visual monthly matrix displaying assigned shifts per employee per day for roster validation before execution.

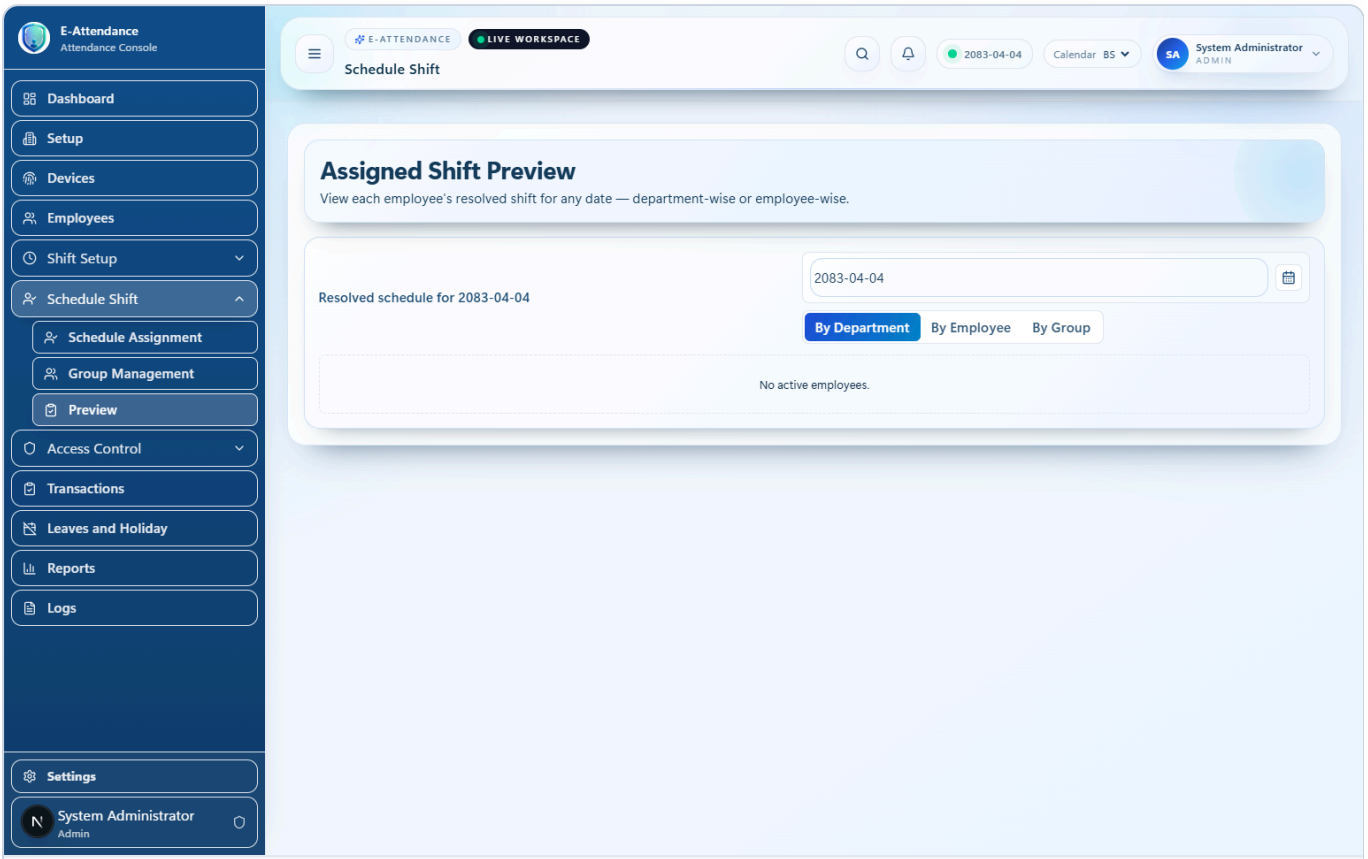

Figure 7.3: Monthly Shift Schedule Matrix Preview

8. Hardware Access Control

Option 12 Access Time Period

Define time slots during which door unlocking is permitted on biometric physical access controllers.

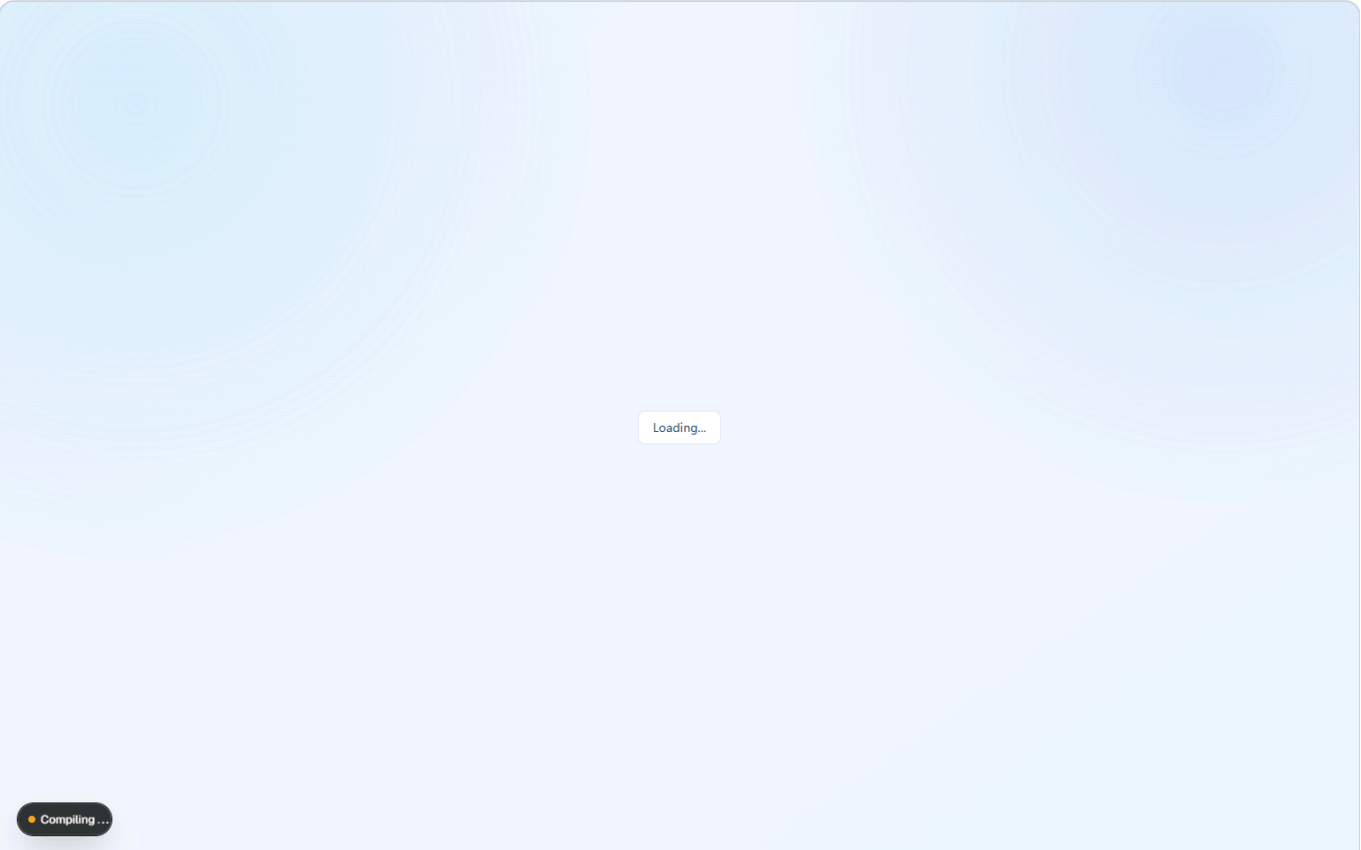

Figure 8.1: Access Control Time Period Setup

Option 13 Access Group Rules

Group time slots and door rights into designated access groups for streamlined security management.

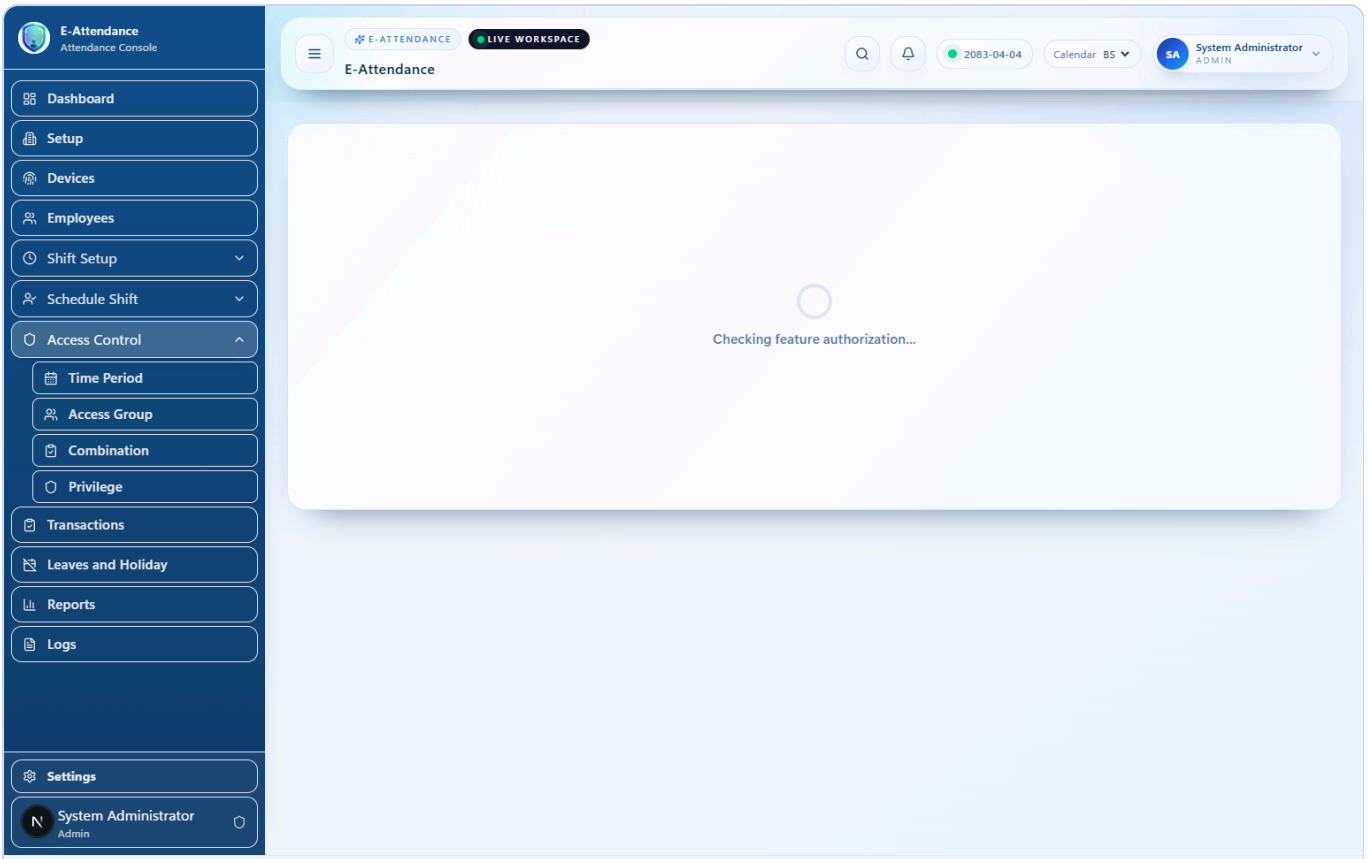

Figure 8.2: Access Group Configuration

Option 14 Multi-Verification Combination

Configure multi-person unlock combinations requiring 2 or more authorized users to unlock high-security doors.

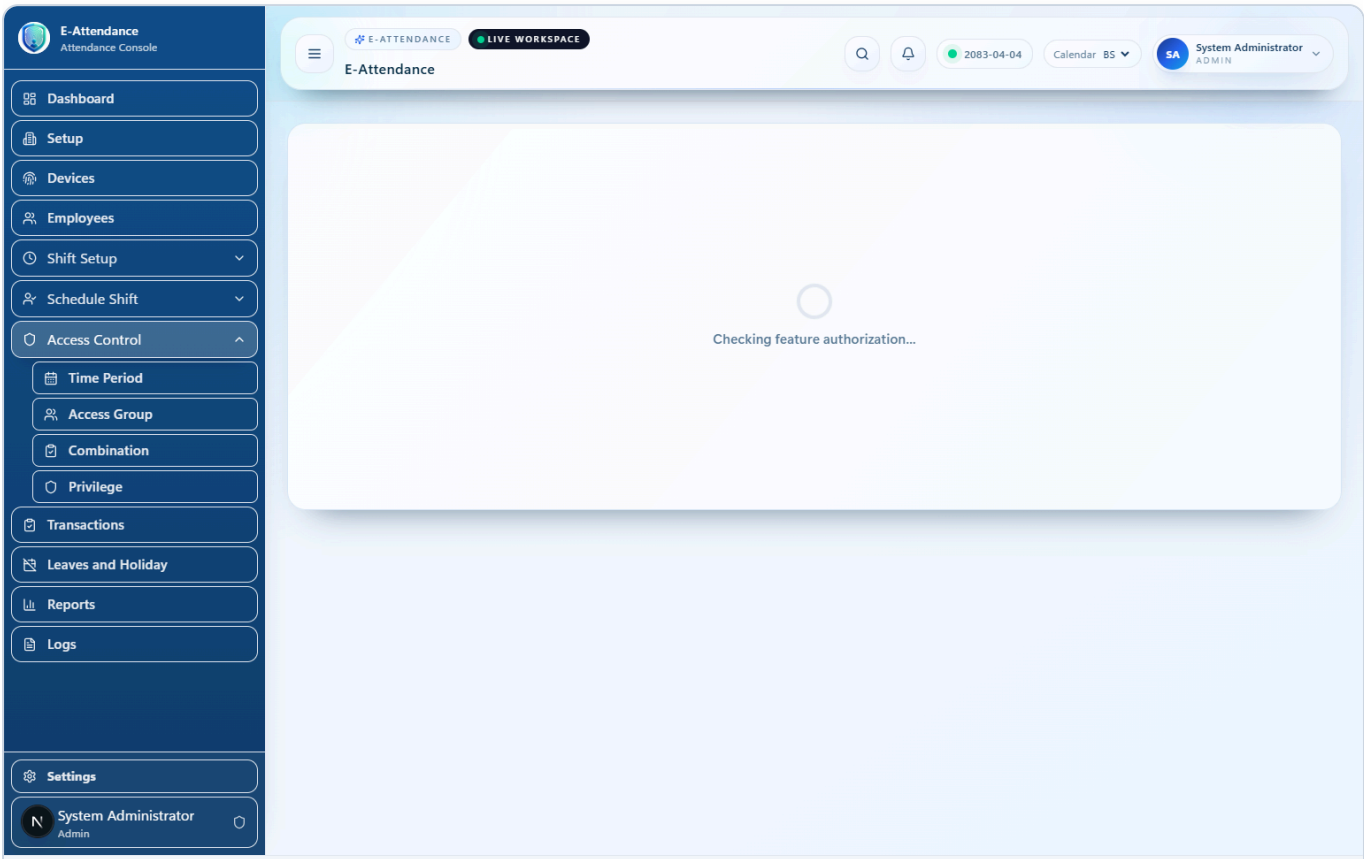

Figure 8.3: Door Unlock Combination Setup

Option 15 Door Access Privilege

Grant or revoke specific door privileges per employee across network devices.

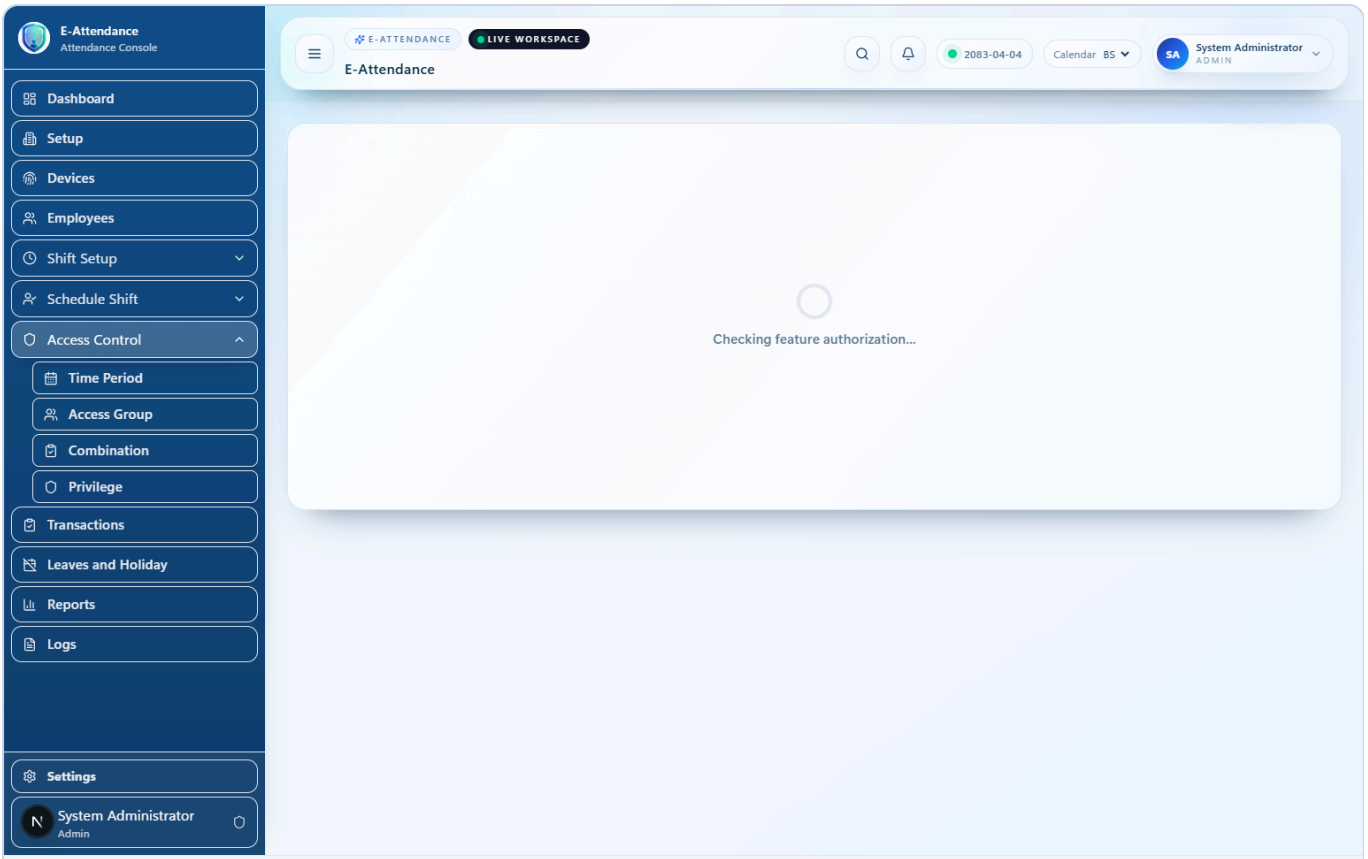

Figure 8.4: User Door Access Privilege Controller

9. Attendance Transactions

Option 16 Transaction Logs & Regularization

View incoming raw biometric transaction logs, perform manual punch adjustments (for missed punches), and process manager approvals for attendance regularization.

- **Raw Log Search:** Filter punches by date range, department, employee code, or punch mode.
- **Manual Punch Entry:** Add authorized manual in/out entries with reason audit tags.
- **Attendance Reprocessing:** Recalculate daily attendance status after shift or punch modifications.

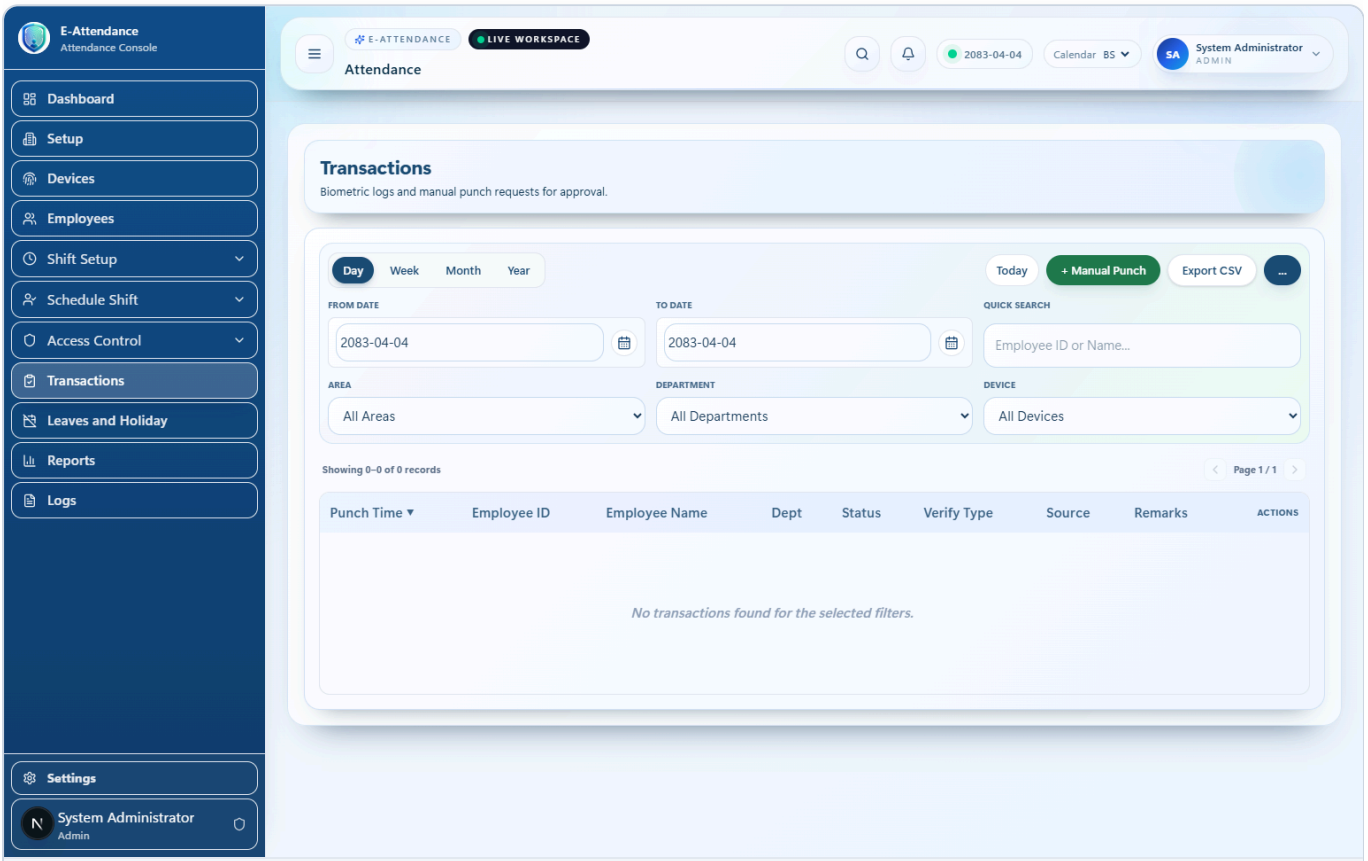

Figure 9.1: Attendance Transactions & Punch Logs

10. Leaves & Holiday Management

Option 17 Leave Records & Public Holidays

Manage employee leave entitlements (Casual Leave, Sick Leave, Earned Leave), submit leave applications, and publish the annual organization holiday calendar.

- **Leave Processing:** Approve or reject employee leave requests with supervisor notes.
- **Holiday Master:** Set recurring public holidays and weekend off schedules.
- **Entitlement Quotas:** Automatic deduction of approved leaves from annual entitlement quotas.

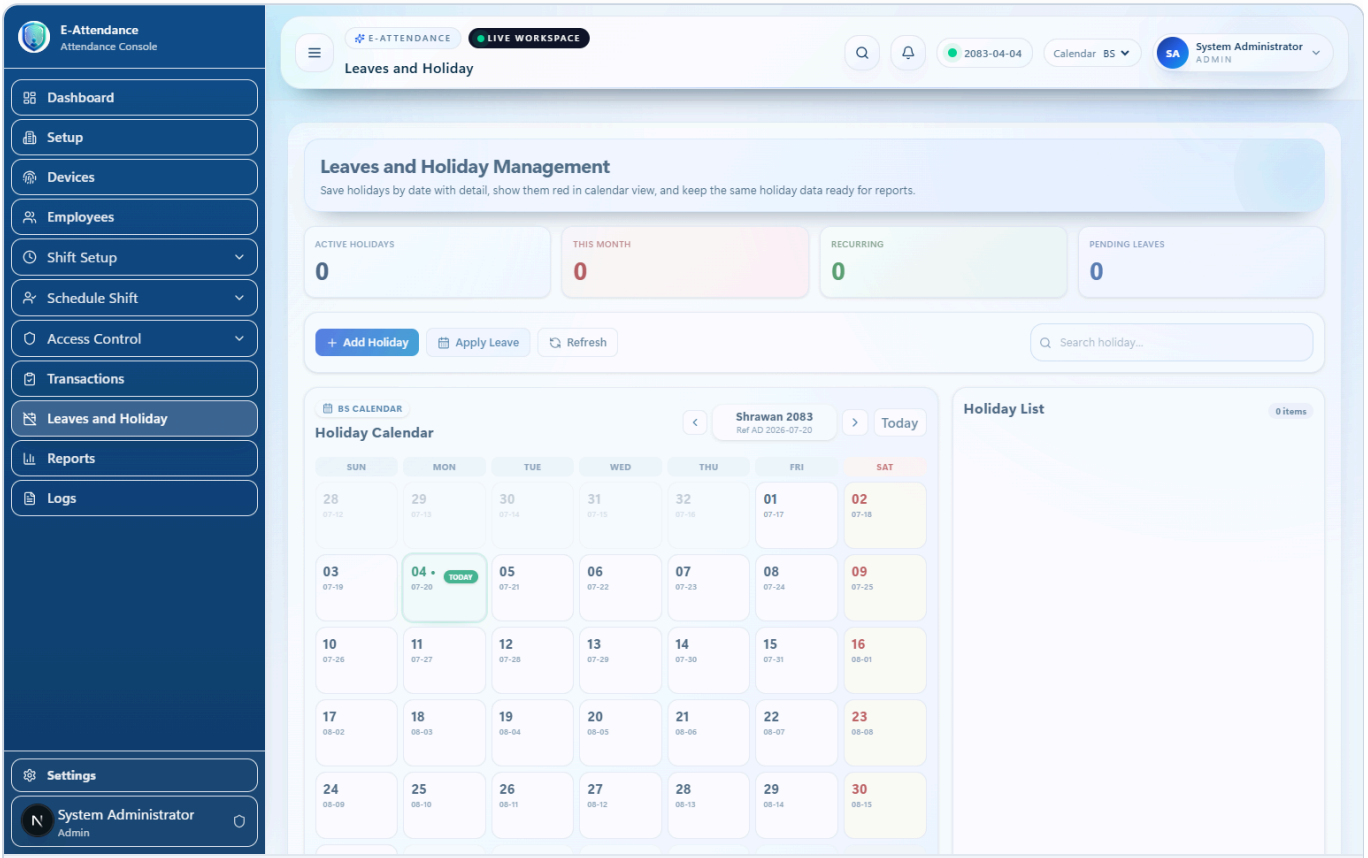

Figure 10.1: Leaves & Public Holiday Master

11. Executive Reports & Analytics

Option 18 Attendance Reporting Center

Generate comprehensive daily attendance sheets, monthly summary matrices, late/early exception lists, and overtime calculations. Supports one-click export to PDF and Excel formats.

- **Daily Attendance Report:** Detailed list of punch times, work hours, and status per staff member.
- **Monthly Attendance Sheet:** Comprehensive grid view showing daily status codes (P, A, L, H, W).
- **Export Capabilities:** Export clean formatted reports directly for payroll integration.

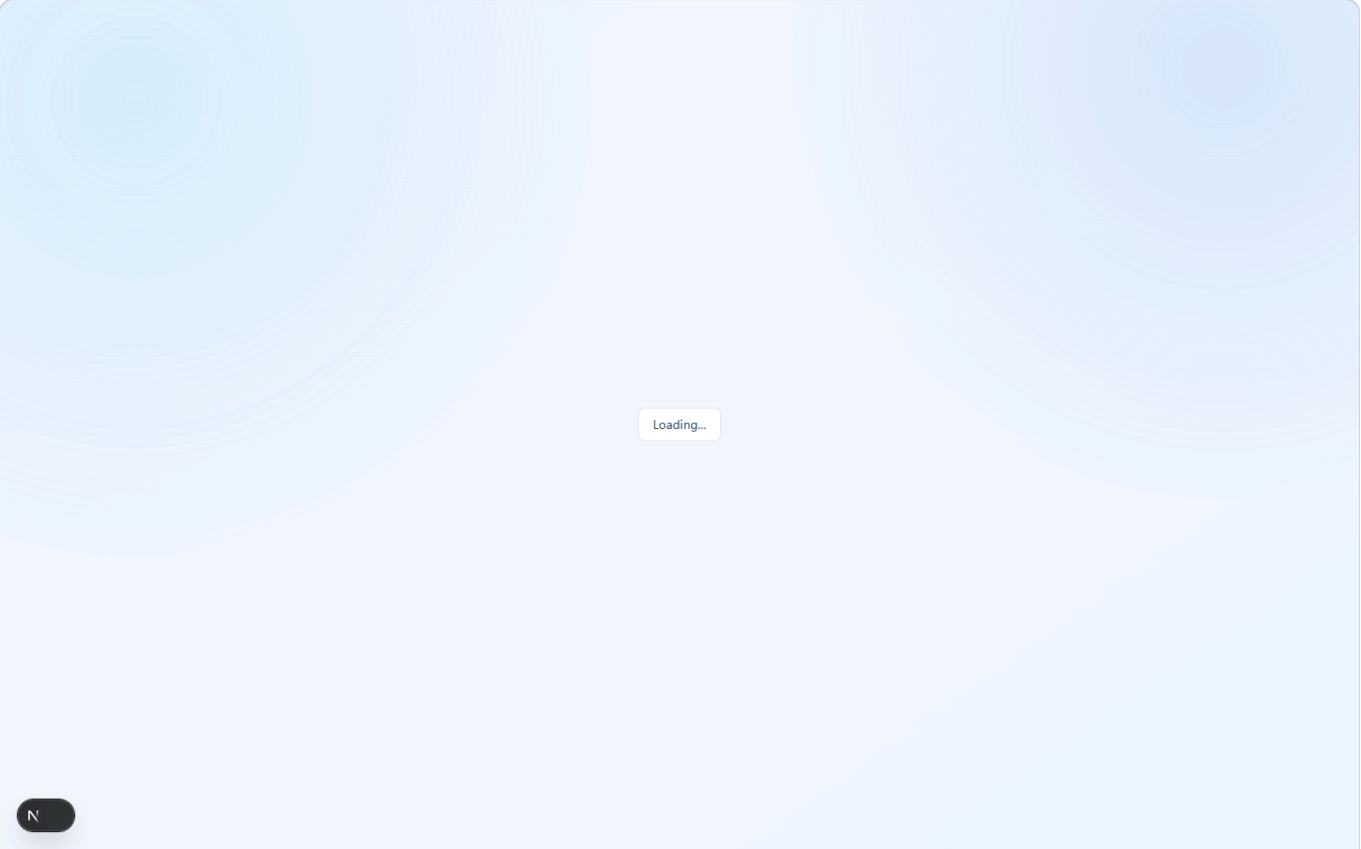

Figure 11.1: Executive Attendance Reports Generator

12. System Audit & Communication Logs

Option 19 Audit Trail & Device Logs

Monitor system activity logs, user logins, data modifications, and Push SDK hardware communication logs to ensure accountability and system integrity.

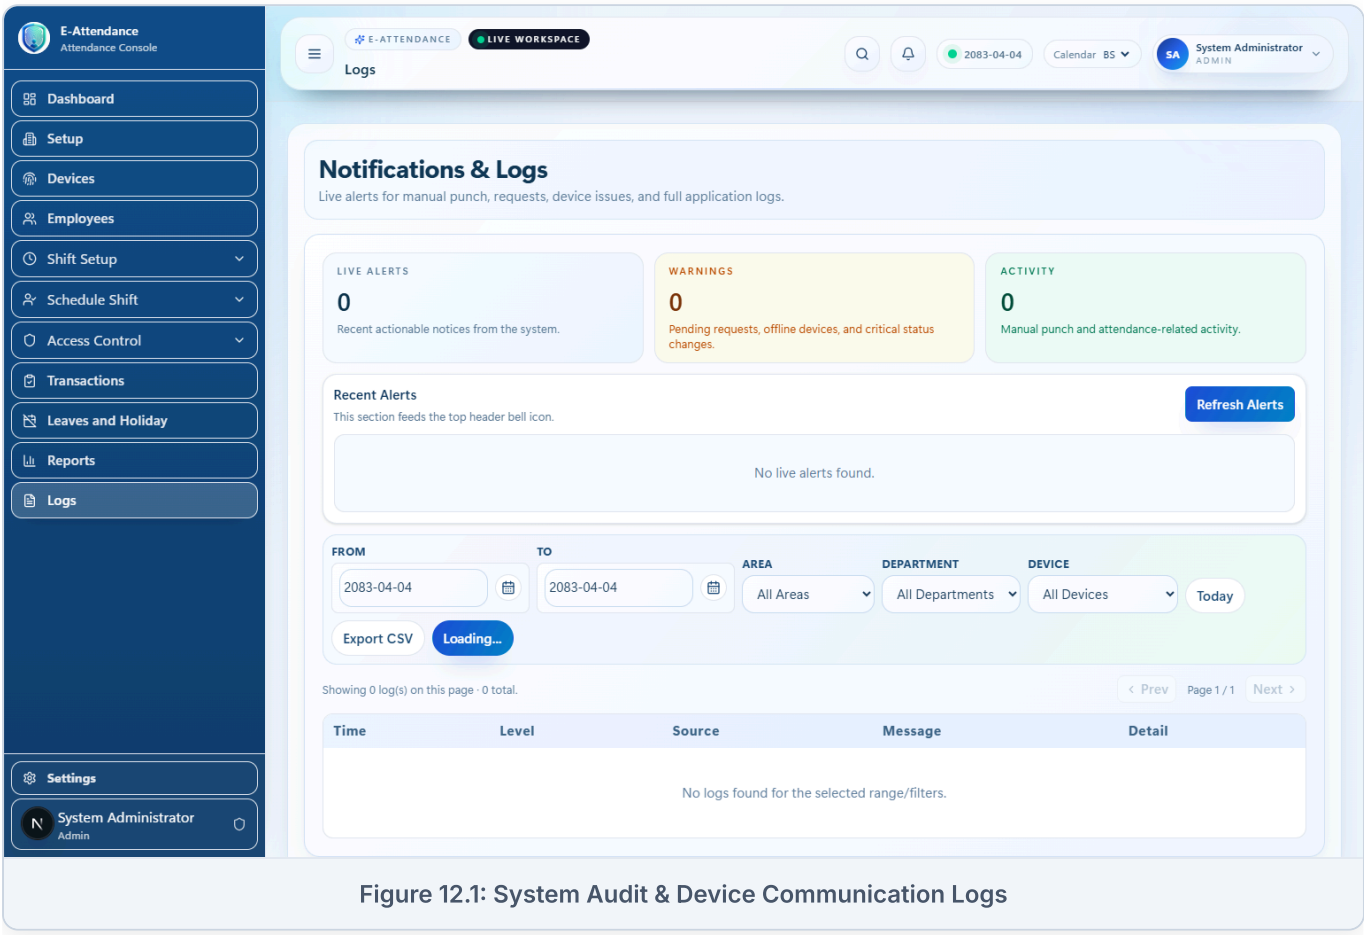

Figure 12.1: System Audit & Device Communication Logs

13. System Settings & Customization

Option 20 Branding, Backup & User Roles

Configure system branding (Organization Name, Custom Logo, Primary Color Palette), manage user accounts with Role-Based Access Control (RBAC), and perform database backups/restores.

- **White-Label Customization:** Upload company logo and select custom sidebar themes.
- **Role-Based Security:** Manage Admin, Manager, and Operator user privileges per module.
- **Database Backup & Restore:** Create point-in-time system data backups.

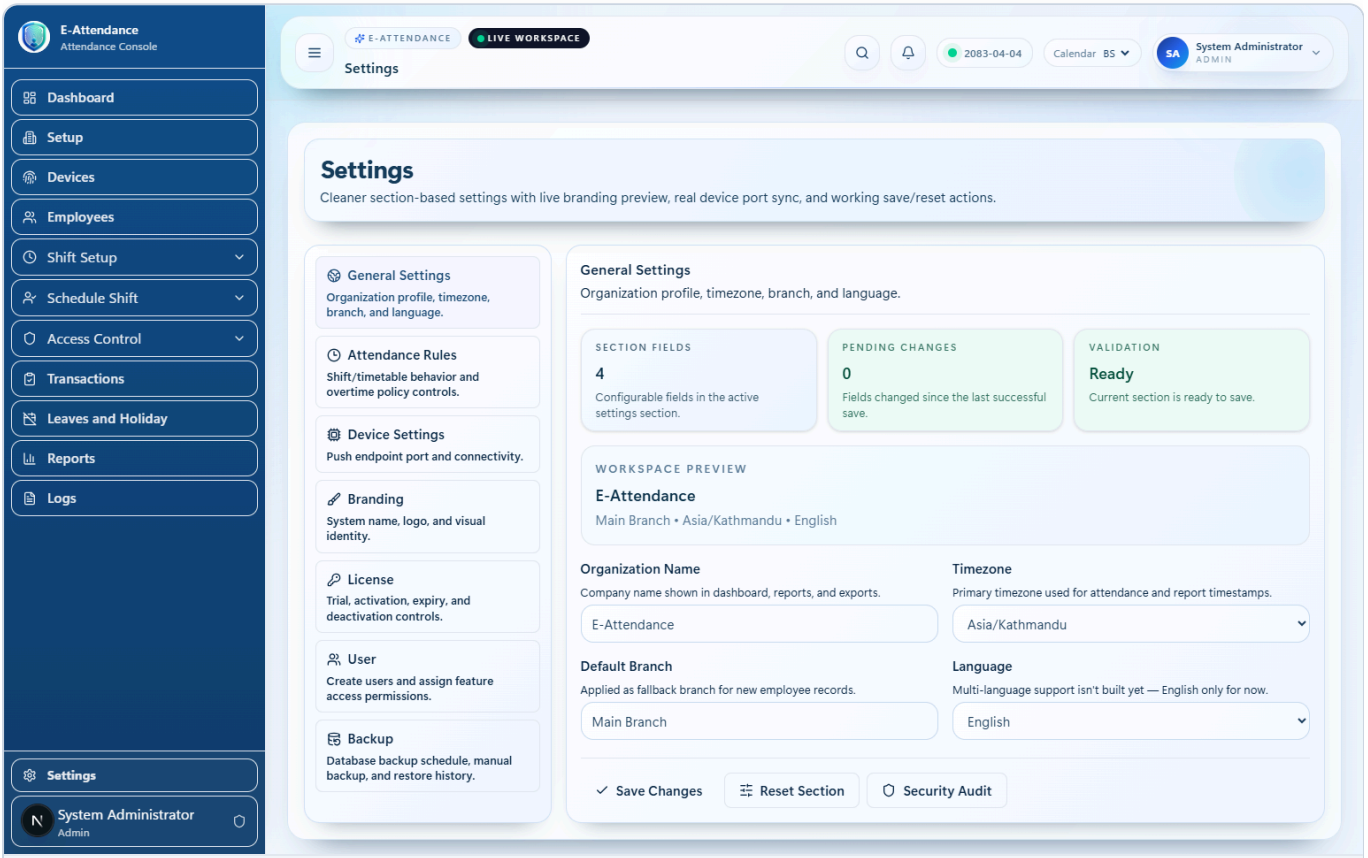

Figure 13.1: System Settings & White-Label Customization

14. Employee Self-Service (ESS)

Option 21 Self-Service Leave Portal

Allows employees to submit leave requests online with dates, leave type selection, and justification notes.

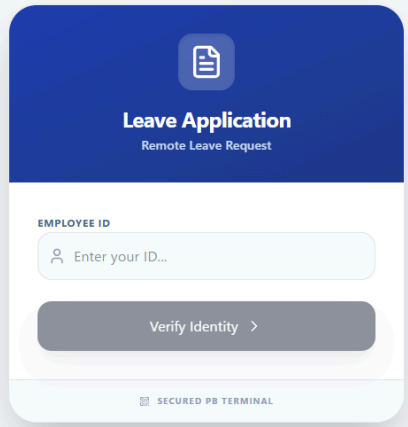

Figure 14.1: Self-Service Leave Application Portal

Option 22 Web Check-In Portal

Enables remote or field staff to log punch-in and punch-out events directly from web browser devices.

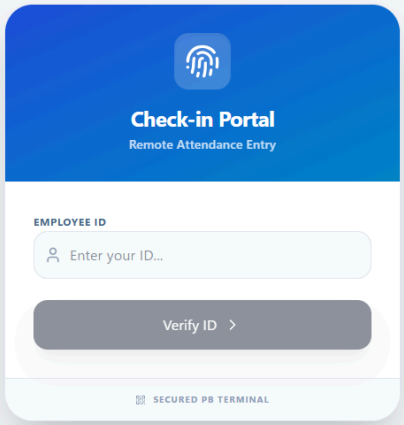

Figure 14.2: Web Check-In / Check-Out Interface
